Re: Fairgrounds Wind Turbine Project

Dear Joanne:

Thank you for presenting the Fairgrounds Wind Turbine Project status at the Cleveland Building & Construction Trades Council meeting on February 17<sup>th</sup>. It was quite interesting to realize that your project could actually go into foundation construction by September and be completed by the end of 2009, if Stimulus funding is secured.

The Trades Council is very supportive of your project and its goals of opening the door for cleaner, renewable energy projects in the Cleveland area. We share your belief that an early installation of a turbine at the Fairgrounds will strengthen community support and, hopefully, entice turbine manufacturers and developers to locate in Cleveland, creating many new jobs.

We commend you on the undertaking of this project and the difficult fundraising. The completed project, seen by the many visitors to the Fairgrounds, will certainly carry an educational role for the community, especially in the early months and years.

Sincerely,

James S. Sullivan, Business Manager  
Heat & Frost Insulators Local 3
